

## Financial Results of the 1<sup>st</sup> Half of FY2023 IBIDEN Co., Ltd.(4062)

October 27<sup>th</sup> , 2023

Forecasts in this statement have been made based on the premise, prospect and plan of IBIDEN as of October 26<sup>th</sup>, 2023.

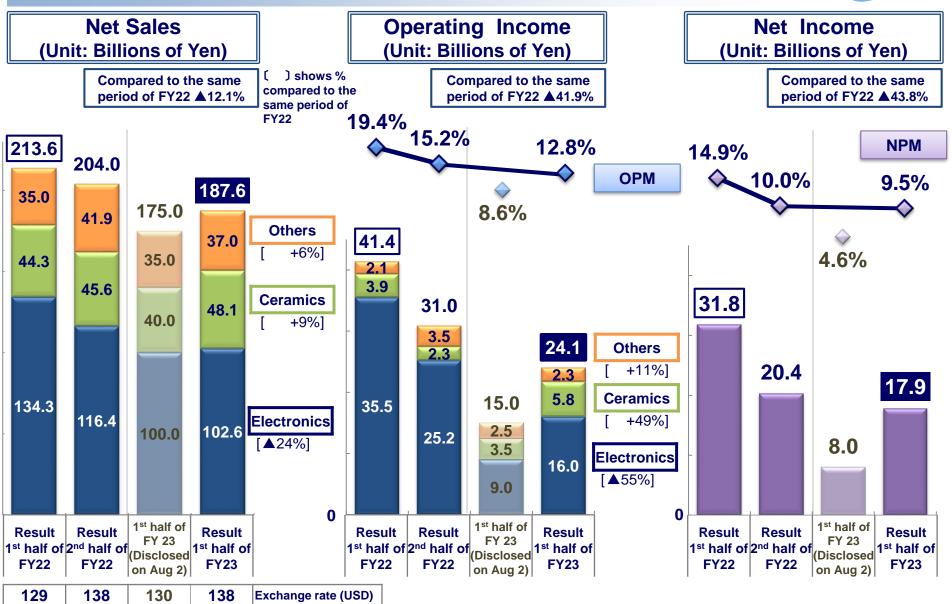

Actual results may widely differ from this statement due to any uncertain factor such as international economy, market competition and exchange fluctuation.

# Market Forecasts and Business Prospects

## **Trend and Change in Electronics Market**

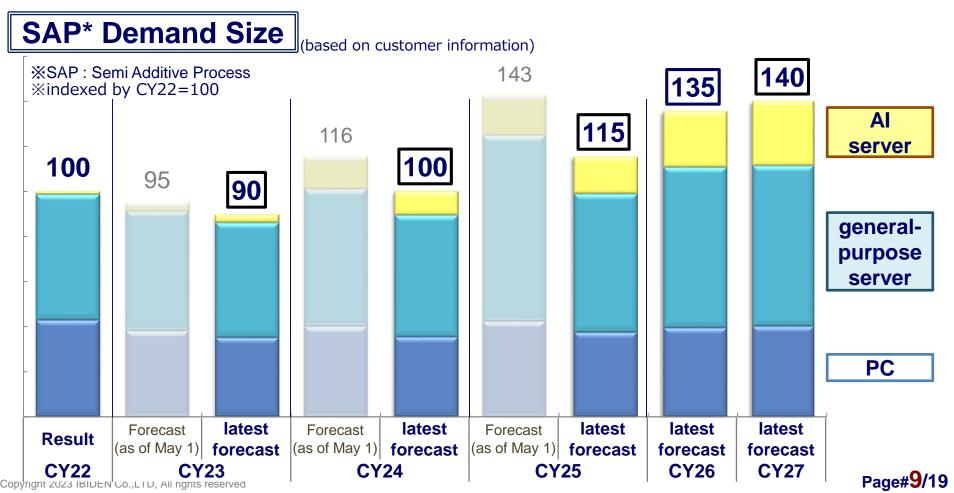

- □ PC Market was leveling out in the early 2023 but not recovered to the level expected as 2022.
- ☐ The growth of Server Market will recover moderately in the early 2024 even though it seems slower than our initial expectations on a recovery trend.

## Perspective of Demand and Investment Plan of IC Package Substrate

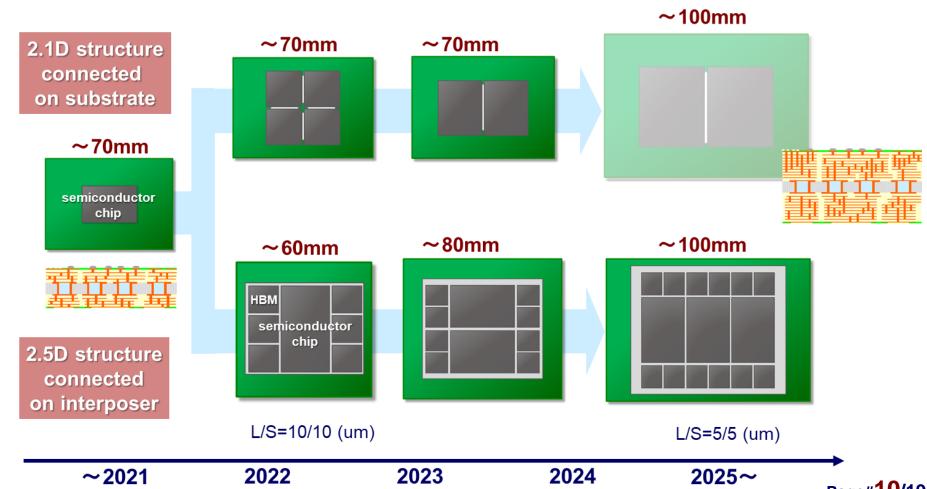

- ☐ The launch of the Ono Plant takes a lead, adjusting changes in demand for IC package substrates.
- □ We are to establish flexible and sufficient production capacities include existing plants in order to meet various customers/needs and demand expansion with generative AI for a medium term.

## Technology Change of IC Package Substrate IBIDEN

- ☐ Highly functional semiconductors are expected due to higher data processing capabilities and energy-saving needs.
- ☐ IC package substrates are increasing added values, which becomes larger, finer, multiple laminations of layers and 3D. We are to develop a medium term technology road map for diverse customers and to develop elemental technologies required in advance.

## **Trend and Change in Ceramics Market**

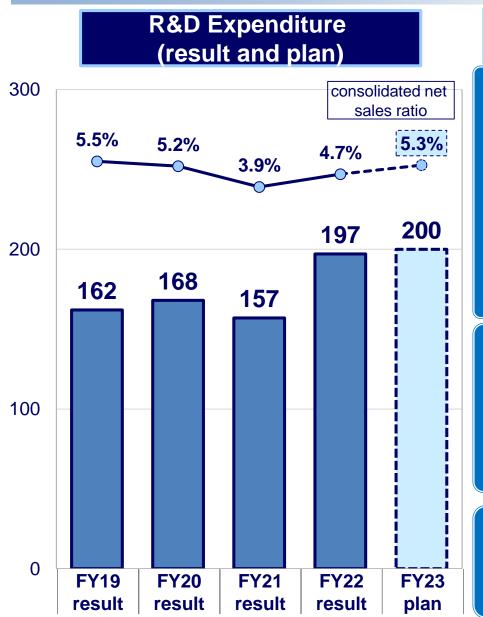

- □ Continue shifting to electrification mainly in developed countries and the passenger car market, but ICEV maintain a certain market share.
- □ The Sic power semiconductor market will expand, with vehicle powertrain shifting to electrification.

## **R&D Activity for The Next Growth**

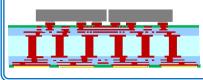

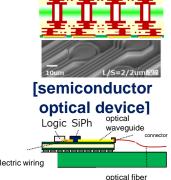

#### **IBIDEN's Development Area**

Electronics Field

- Next-generation3D package
- > Glass core substrate
- Semiconductor optical device

[glass core substrate]

[next-generation PKG]

## NEV

- Materials for NEV
- LiB safety material
- Heat resistant and heat insulation material
- Heat resistant and electrical insulation material

New Field

- Plant activator "LEAF ENERGY"
- ➤ CO₂ fixation technology

## Medium-Term Forecasts

## Plan of Capital Expenditure and Depreciation IBIDEN

#### **Mid-Term Forecasts**

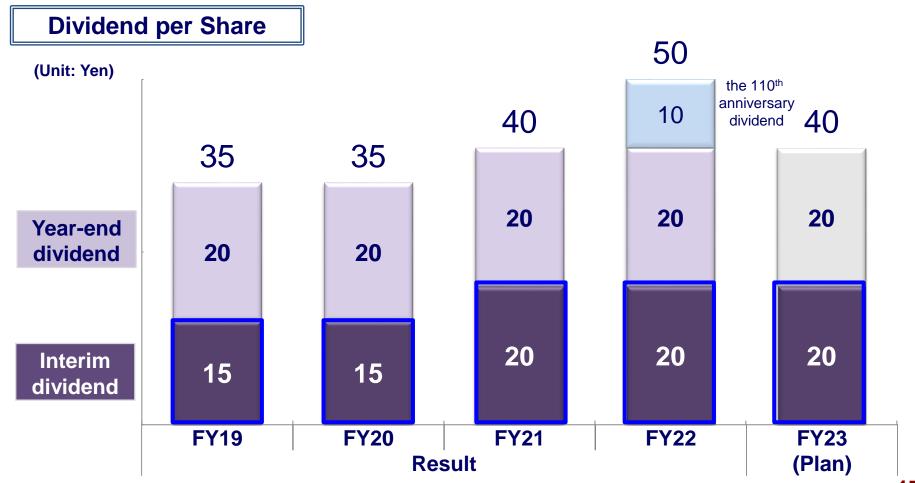

## Return to Shareholders

### Capital Allocation and Return to Shareholders IBIDEN

- □ We will continue large investment in IC package substrates in response to current market change properly, with anticipating a medium-term demand expansion.
- ☐ Stable dividend payment should be kept in the return to shareholders.

# Activity Toward Decarbonized Society

#### **Activity Toward Decarbonized Society**

## Aim for Carbon Neutrality in All IBEDEN Production Bases by the Early 2040s

goal

#### 1. Energy Saving Activity

- Promotion of energy-saving activity with 3R
- Installment of energy-saving facilities and efficient investment

cogeneration equipment

#### 2. Renewable Energy Activity

 Hydroelectric & solar power generations with renewable energies

IBIDEN's founding business Hydroelectric Power generation

Solar Power generation

#### 3. Carbon Offset Activity

- Greenery business and shift to new energies (H<sub>2</sub>,NH<sub>3)</sub>
- Technology development of carbon capture and storage

goal by the early

2040s

IBIDEN's Forest

slope facing technology with landscaping
